

G-BH8 Side Channel Blowers

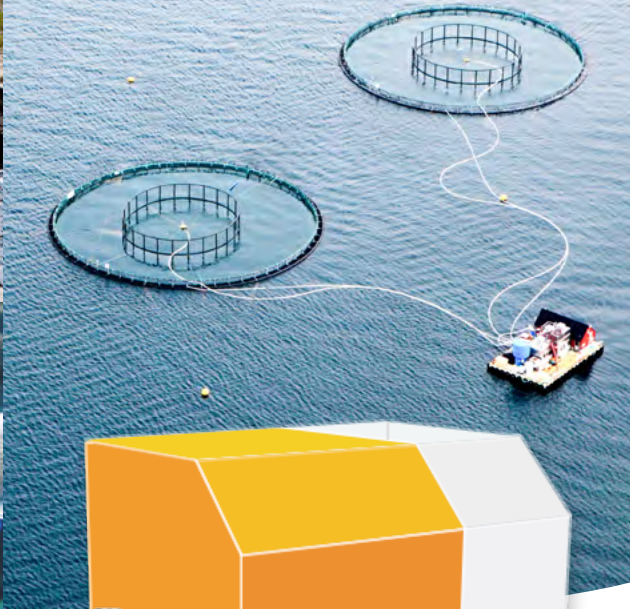

The Slim Revolution in Pellet Conveying

Fishfarming poses several challenges for vacuum pumps and compressors: space on the barges is limited, service and maintenance operations are difficult and noise and pulsation from machines disturb the fish. Elmo Rietschle is now introducing a revolutionary technology – the G-BH8 side channel blower specifically designed for aquaculture.

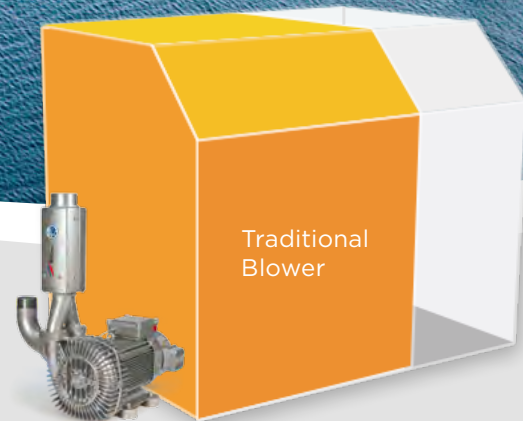

More Air at Less than Half the Size

- Extremely compact
- Easy to handle
- 87 x 63 x 52 cm (H x L x D)
- Weight 75 to 85 kg (depending on model)
- Low noise level of 77 dB(A) without sound enclosure
- Maximum differential pressure: 1 bar
- Permanent magnet motor
- Easy to install
- Dry running
- Virtually maintenance free
- No pulsation
- Flexible speed drives make sure you consume just the power you need.

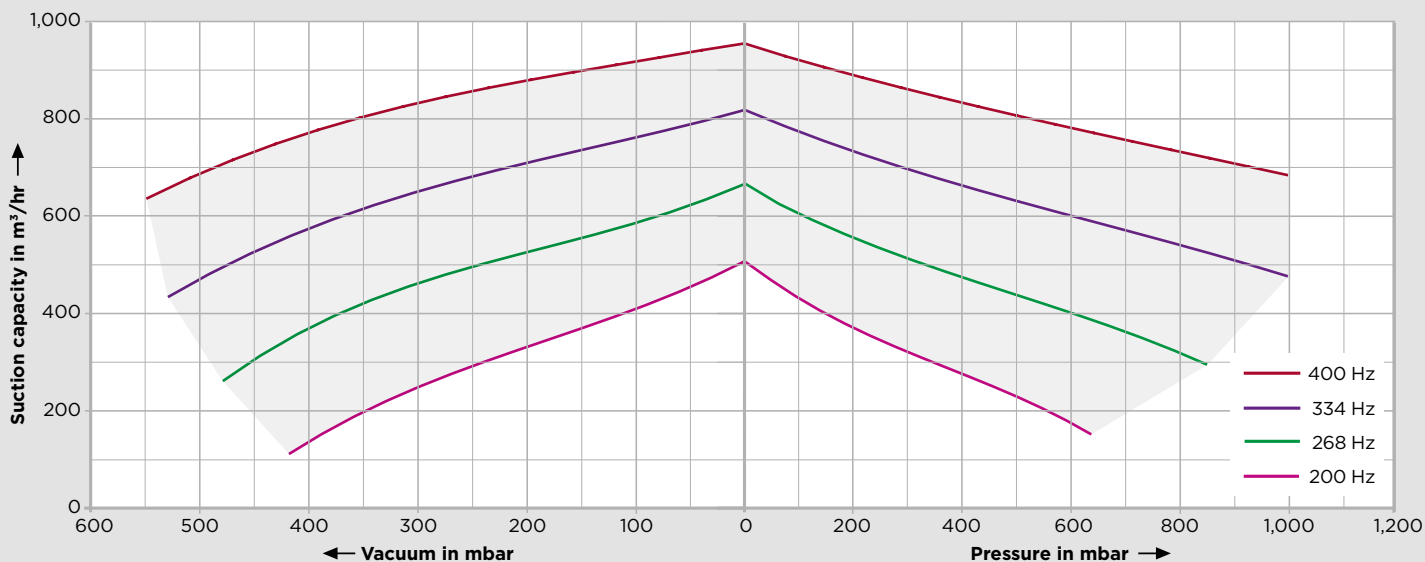

**More air for your existing space -
no need to add another barge**
